JOB INFORMATION SUMMARY

JOB TITLE: **Full Stack Software Developer**
LOCATION: **Cape Town, Century City**
SALARY: **Market Related**
LEVEL: **Mid./Snr.**

Have you ever wanted to be a part of a global team focussed on enriching business communication using innovative technology? If the answer is a resounding yes, hi.guru has an exciting opportunity for a full stack developer available at their offices in Century City, Cape Town.

At hi.guru, tech is at the heart of what we do. Our key mission is to enable businesses, their customers and their staff to communicate more effectively by using a technology-enabled platform that integrates their existing messaging channels into one. Read more here: https://hi.guru/

As part of our talented dev team, you will play a critical role in the shaping of the software product and solution. If you are a tireless problem solver, self-driven, possess the technical rigour and skills to deliver clean efficient code, and have the confidence to work alongside a team of hardworking, yet fun-loving developers, content creators, UI designers, product owners and client stakeholders, please send us your CV and a cover letter telling us about a time where you had to use a unique approach to solve a complex coding problem and delivered an exceptional outcome.

Responsibilities
• Perform unit testing on newly developed features
• Be able to accurately estimate development efforts
• Maintenance, debugging and problem-solving of existing software products and/or custom client solutions.
• Do code reviews and maintain levels of quality control
• Participate in technical planning and implementation meetings
• Participate in the Daily Standup meetings
• Participate in Sprint Planning Development Cycles every 2 weeks.

Qualifications and Competencies
• The successful candidate should possess a B.Sc computer or B.Eng electronic/computer degree or higher.
• Experience doing automated testing.
• Experience working with the following software:
- Ruby on Rails
- Elixir
- XML, JSON, REST
- MySQL
- CircleCI
- AngularJS
- ReactJS
• Experience working with software packages like Git and JIRA.
• Knowledge of C/C++ advantageous.
• Embedded Linux, driver development will be advantageous.
• Working knowledge of XMPP/MQTT/SIP will be advantageous.

Qualities
• Results driven
• A good communicator
• Proactive
• A team player

Should you meet the requirements for this position, and would like to be part of an innovative and forward thinking team, please send your CV and relevant documents to charl@hi.guru ideally before Friday, May 31, 2019.

This position reports to the VP of Engineering.

Companies may expire jobs at their own discretion.
Please note: Only short-listed candidates will be contacted.
